DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5-30-2007 has been entered.

Response to Arguments

2. In the remarks filed 5-30-2007, applicant argued the following:
- A. On page 4, that as agreed on in the interview, the addition of the claim limitation, "only one optical reflection means" overcomes the present art rejection.
3. Argument A is moot in view of the new grounds of rejection, which has been necessitated by amendment.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3663

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Park et al. (USP No. 2002/0003655).

- Regarding claim 1, Park discloses:
 - Only one optical reflection means... [Fig. 4, #81]
 - Optical anti-reflection means... [Fig. 4, #36]
 - An optical amplifier... [Fig. 4, #35]
 - Wherein the ASE... [¶ 0045]
 - Wherein... gain is clamped. [Fig. 9(a)]
- Regarding claim 2, Park discloses [Fig. 4, #81].
- Regarding claim 5, Park discloses [Fig. 4, #36] and [¶ 0045].

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.

Art Unit: 3663

3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Park as applied to claims 1, 2 and 5 above, and further in view of official notice. Park discloses the invention with all the limitations of claim 1, but fails to disclose using an SOA instead of an EDFA. Official notice is taken that EDFA's and SOA's are well known to be functional equivalents in many cases and that one could make the replacement and necessary modifications with a reasonable expectation of success. Therefore, it would have been obvious to one skilled in the art (e.g. an optical engineer) at the time the invention was made, to swap an SOA for the EDFA of Park, for the advantage of making the device smaller.

Conclusion

Art Unit: 3663

10. While patent drawings are not drawn to scale, relationships clearly shown in the drawings of a reference patent cannot be disregarded in determining the patentability of claims. See In re Mraz, 59 CCPA 866, 455 F.2d 1069, 173 USPQ 25 (1972).

11. The references made herein are done so for the convenience of the applicant. They are in no way intended to be limiting. The prior art should be considered in its entirety.

12. The prior art which is cited but not relied upon is considered pertinent to applicant's disclosure.
